**TESTIMONIAL**

Linda was our Costume Designer on the feature film "DELIRIUM", a contemporary drama set in a traditional British university college. She did a brilliant job creating a vibrant and exciting costume collection for each of the characters, which perfectly complemented the mood and setting of each scene.

She has an excellent sense of character and a ruthless instinct for where to get just the right piece to bring the whole concept into focus! Linda is extremely experienced - we first worked together at the BBC a number of years ago - and she brings a wealth of design knowledge to the job along with her wonderful intuitive people-management skills which make everyone feel not only at their ease, but special.

She is great with cast, and an excellent organizer of her team. Needless to say, this is invaluable in the middle of a hectic shoot with early starts and late finishes. Linda's commitment to the job is unwavering. She's a wonderful supportive colleague whom I would heartily recommend.

*Fiona Howe - Producer, Scenario Films*
